Ratio																

DIVER TO COACH/TEACHER RATIOS

To ensure that a safe and effective coaching/teaching situation is maintained it is recommended that the following maximum ratio of participants to Coach/Teach.

Pre-School classes: 8 participants to 1 coach

General / Recreational classes: 12 participants to 1 coach

Competition Divers: 15 participants to 1 coach

However when groups are warming up, cooling down or working on low risk activities on a floor area, the ratio may be increased within the bounds of safety. For other activities the ratio of participants to coach will vary according to the activity, the experience and ability of the child and coach and the type of facility. When working with participants with disabilities a competent assessment of the risk to the participants must be made in determining the ratio of child to coach, which may range from 2 to 1 through to 8 to 1. There should always be a minimum of 3 persons in e.g. the gymnasium, one of whom must be an appropriately qualified coach.
